

Every agent action, **provable**.

Voice and process agents book jobs, write to CRMs, take payments, send messages. The question that decides whether they reach production is not “*does it work?*” — it’s “**can you defend what it did?**” Proof Mode is the evidence layer for agentic operations: every tool call is evaluated against policy **before it executes**, and every decision — allowed, escalated, or blocked — is sealed into a tamper-evident, independently verifiable receipt chain.

HOW IT WORKS — ONE NEW HOP, NO RE-PLATFORMING

WHAT THE BUSINESS GETS

- ✓ **A defensible record** of every agent action — who acted, on what authority, from what evidence
- ✓ **Escalations with teeth** — charges over the cap wait for a named human; the approval is a receipt too
- ✓ **Fail-safe restraint** — sensitive data, unverified callers, runaway loops blocked by default, with proof the control fired
- ✓ **Deterministic replay** — disputes end in recomputation, not testimony
- ✓ **Audit-ready evidence** — maps to SOC 2 / ISO 27001 logging & change controls, NIST AI RMF, EU AI Act record-keeping

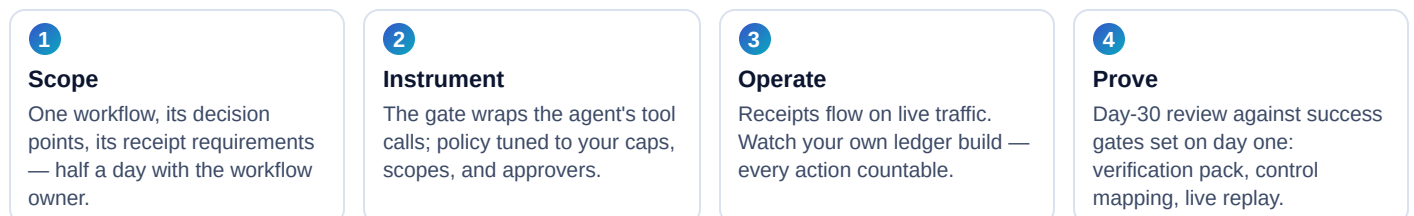

WHAT IT DOES NOT REQUIRE

- No customer data, call recordings, or credentials to start
- No production access — pilots begin customer-safe
- No agent rewrite — SDK wrap, gateway proxy, or one webhook (POST /v1/evaluate)
- No trust in Summit — the exported ledger verifies with ~15 lines of code, in any language, by anyone

SEE IT RUNNING — LIVE, IN YOUR BROWSER (FORWARD FREELY)

Agent Tool-Call Demo	demo.summitcognitive.ai/proof-mode-tools.html One customer call, end to end — verify it, tamper with it, replay it. Walkthrough video: /proof-mode-demo-walkthrough.mp4
Proof Mode — Live Sandbox	demo.summitcognitive.ai/proof-mode-sandbox.html Agents executing real tool calls on live traffic + the full lifecycle, install → audit. Video: /proof-mode-live-sandbox-walkthrough.mp4
Production system	decrec.summitcognitive.ai The live Decision Receipt ledger gating real autonomous actions today — receipts, verdicts, public JSON ledger.

THE 30-DAY WORKFLOW PILOT

Fixed-fee, fixed-scope, 30 days. Success gates are agreed in writing before work begins, and the pilot fee credits toward an annual rollout when the gates pass. Delivered in partnership with your existing agent provider — they stay your account lead.
